

We locate and provide the fab equipment your require

Fab-Finder, Inc.

China strategy

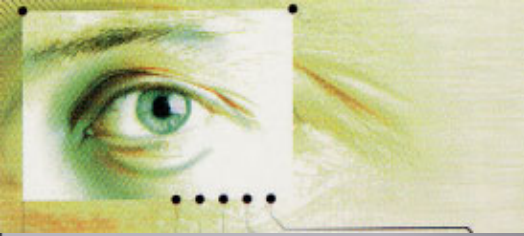

Paul Chang

October 31st, 2009

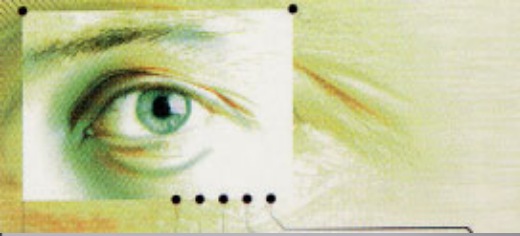

Introduction of Fab-Finder

- Fab-Finder has done business with China since 2005
- We have successfully Refurbished used 4", 5" and 6" equipment for the China Semiconductor market
- Since 2007, the majority of our work is with 8" tools
- We have successfully moved whole fab lines line from other countries into China- including the Technology!
- Fab-Finder has major connections with Intel, Atmel, HP, Motorola, TI, Micro etc.
- We have experience with, and can help solve all financial issues with China Gov.

Previous Fab-Finder Strategy-

- **Locate Fabs or Tools Globally**
- **Refurbish to Functional**
- **Move to China after final inspection**
- **Customer has been responsible for Installation and Setup**

New Fab Finder Strategy-

- Identify partner in China
- Fab-Finder partial ownership of the Fab
- Fab-Finder responsible for providing the required used Equipment, and for sales of excess tools
- The creation of a Technology Partner
- Fab-Finder Marketing
- Sales assistance (or ownership)
- Organization of a Management Team
- Commitment with the New Fab and Grow Together
- Win-Win Strategy

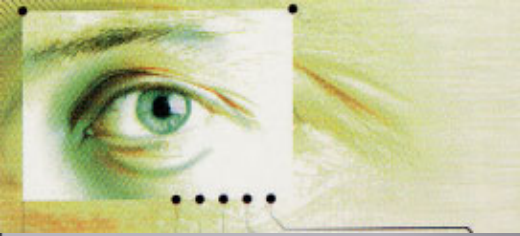

Fab-Finder New Market Approach

- Provide Turn Key solutions
- Fab-Finder to negotiate/supply key required tools.
- De-installation, De-contamination, rigging, crating, custom, Shipping ,
- Refurbish, Installation, Equipment Support
- Technology Transfer
- Creative Financing

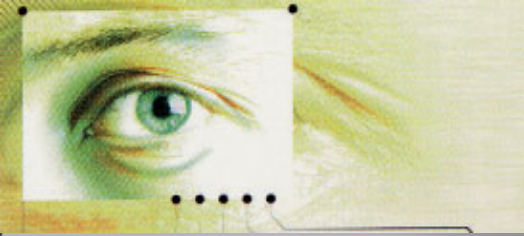

Basic Fab-Finder revenue concept concept in China...

- A Foundry's worst nightmare is lack of Customer
- Fab-Finder Inc, can help transfer basic technology and client information, allowing the foundry at least basic income to sustain the fab
- New company in long term target for higher technology such as .18um or even lower
- Fab-FinderInc also can help to get high end market client , but need time to develop

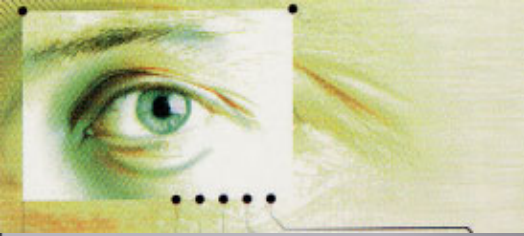

Fab-Finder Process Expertise

- BCD(Bipolar, CMOS, DMOS(.5um))
- MOSFET(flat)
- Flate Schottky
- Trecnched Schottky
- Trenched MOSFET
- Schottky MOS
- BiCMOS(.35um)

Fab-Finder potential client products

- MOSFET
- PFC Function chip, estimate 500M parts per year
- Pulse Modulator, 38C42, 1 Billion parts per year.
- MOS Schottky, for Solar Power chip
- IGBT(1200 V)
- TRENCHED SCHOTTKY
- CMOS DEVICE

Fab-Finder can provide the Process and technical expertise...

- **The World Wide Recession has resulted in a large Retired Chinese Engineering Resource in Silicon Valley**
- **Fab-Finder is connected to many of these Key Experienced Engineers and has worked with many of them on Global Projects**

We locate and provide the fab equipment your require
